ALLOWANCE

1. The following is an Examiner's Statement of Reasons for Allowance:

Claims 1-6 are allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose an apparatus which includes optical pickup which includes "two beams [not three] and main beam and sub-beam are aligned along the same track [i.e. center of both beams is near the center of the track] and generates a seek direction detecting signal from phase difference between the track cross signal and the track error signal". It is noted that the closest prior art, Watabe (US patent 6,147,952) shows a similar apparatus which has a similar apparatus and Ohno (US patent 5,828,634) shows three spot method where spots are aligned. However Watabe and/or Ohno fails to disclose two beam method and generation of seek direction detecting signal.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
